OBJECTIVE

A 23-year old Business major and a technology freak. I am running in the pursuit to master the art of management by working in a challenging environment. So, hoping to join a dynamic association to improve and gain proficiency with abilities like people management and handling challenging situations.

EDUCATION

Bachelor of Business Administration, Finance

09/18 –Continue

- Namal Institute Mianwali, Pakistan

F.Sc Pre-Engineering

09/14 –05/16

- Punjab College, Samundri

PROJECTS

- **Portfolio Management:** This project had assigned us to select a portfolio of companies based on different statistical and fundamental analysis, which helped us to understand how the stock investment and stock exchange works. This was a three-month long process which resulted in loss or gain from the portfolio. All of this was done on a demo account provided by the instructor.
- **Forex Trading Using Meta Trader 5:** A class project in which we had to choose 5 currency pairs and trade on them, which resulted in the knowledge of how currencies gain or loose and how hedging and arbitrage are made possible.
- **Gourmet Bakers Supply Chain:** This was another of my class projects in which we were made to study the supply chain of Gourmet Bakers. It included all their process starting from attaining raw materials, producing, and processing products to delivering and selling them in-stores.
- **Selling Telle-Marketed Products:** We were provided with some products and told to sell them while working in a team of 6, I lead that team and we ended up with making really good profits at the end of project.

SKILLS

- **Languages:** Python
- **Tools:** MS Word, Excel, PowerPoint, MS Projects
