## PROJECTS

---

**Apna Medical Store (Android app):** Developed a Apna Medical Store app in java using real time database (firebase).

User can place the order and can see his/her records. Also used google map API to show the location of medical store and current user on the map.

**Apna Medical Store (Web app):** Developed Apna Medical Store website in which flask is used for backend.

Admin can add new medicines in the store and also confirms the orders and user on the other hand can place the order and can see the status of order.

**Netflix Clone (react):** developed a Netflix clone in react using TMDB API. List of movies is displayed and user can watch the trailer of any movie.

**Check Weather (react):** developed a Check Weather app in react using OpenWeather API. Where user enters the name of his/her city and weather report is fetched using API and displayed to the user.

**Namal Alumni Portal (in progress):** My FYP is Namal Alumni Portal which is in progress. We are using full MERN stack for the development of web app in which Namal's alumni can contact with Namal current students and post the job opportunities. We are trying to implement web hooks to keep our website dynamic.

## ADDITIONAL EXPERIENCE

---

Member of Aesthetic wing, **Namal Environmental Society (NES)**

Trainer in **open source society (OSS)**
