**Mobile Application Developer** specializing in **Flutter**, with **1+** years of experience delivering cross-platform apps for Android and iOS. I bring a solid foundation in clean architecture, **state management**, and **cloud integration**, with a genuine passion for building apps that solve real problems — proven through **5+** successfully shipped client projects.

## EDUCATION

### Bachelor of Science in Computer Science

Namal University Mianwali

11/2022 - 06/2026

#### Courses

- Object Oriented Programming Algorithms, Software Engineering, Parallel and Distributed Computing, Artificial Intelligence, Machine Learning, Discrete Mathematics, Operating System, Information & Cyber Security, Natural Language Processing

## PERSONAL PROJECTS

### Cotton Lint Quality Grading (FYP)

- Built an **AI-powered cotton lint grading system** using **OpenCV, CNNs, Vision Transformers**, and **Flutter**, enabling fast and accurate cotton quality assessment through automated **texture, color, cleanliness**, and **fiber analysis** in a mobile app.

### Namal Mess Management App

December 2024 - May 2025

- Developed a real-time university mess management platform using **Flutter, Firebase Provider**, enabling secure meal ordering, PIN and fingerprint authentication, and live order monitoring through integrated **mobile and admin applications**.

### The Red Thread – Social Journey & Memory App

Fiverr Project

- Developed a collaborative social app with shared Threads, bucket list memory capture, auto-generated timelines, and integrated **Google Places API** to suggest nearby places based on the user's current location. Use **Firebase** as backend also implement **Push notifications** using **FCM**.

## EXPERIENCE

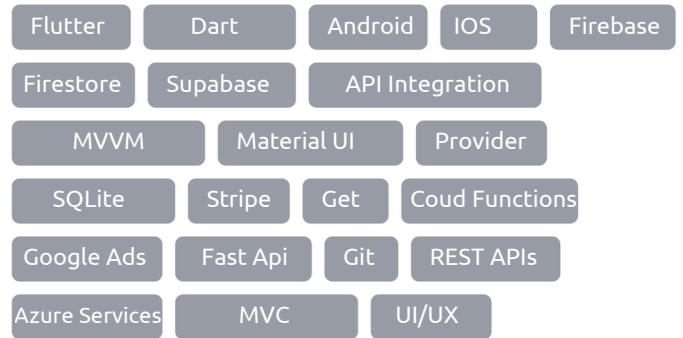

### Freelance Flutter Developer

fiverr Sep 2025 – Present

- Developed and delivered 5+ cross-platform mobile applications for diverse international clients, **achieving Level 1 Seller** status through consistently high-quality work and client satisfaction.

Designed responsive user interfaces and integrated cloud services (Firebase, Supabase) for real-time data handling and scalability.

## SKILLS

## CERTIFICATES

### IDEATHON & INNOVATION EXPO May 2026

Exhibited the Cotton Lint Quality Prediction project at Namal Idea Club's Ideathon 26 & Innovation Expo, presenting an AI-based mobile solution for automated cotton lint grading to an audience of students, faculty, and industry evaluators.

### Flutter Development Course — W3Scube Tech

July 2024

Completed Flutter Development Course at W3Scube Tech, gaining practical experience in building cross-platform mobile applications using Dart, Flutter UI components, GetX state management, REST API integration, and Firebase backend services.

### Software Engineer Intern — Software Development Cell at Namal University

June 2025 - August 2025

Software Engineer Intern at Software Development Cell, Namal University — contributed to internal software projects, collaborated with cross-functional teams, and applied hands-on development skills in a professional environment.
