EDUCATION

Bachelor of Science in Computer Science

Namal University Mianwali
Oct 2022 - Present | 2.96 CGPA

Courses

- Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Web Development, Cloud Computing, Cyber Security

PROJECTS

Perfomix: Performance Management System

Final Year Project

Built a web-based performance management system using React, Node.js, and MySQL, enabling employee performance tracking, task management, and role-based access control through a centralized dashboard for organizational monitoring.

GBone Apparel – E-Commerce Platform

Fiver Client Project

Built a full-stack fashion eCommerce platform using React, Node.js, Firebase, and Tailwind CSS, featuring payment integration, order management, and admin dashboards.

OTT Reseller Platform

Fiver Client Project

Developed a WordPress-based reseller platform using PHP and MySQL, enabling automated order handling, role-based access control, and secure digital product purchases.

WORK EXPERIENCE

Web Development Intern

BMA Solutions [🔗](#)

Worked on developing and maintaining web applications using PHP and MySQL for client-based projects, including database operations, authentication systems, form handling, debugging, and backend functionality implementation.

Freelance Web Developer

Self-Employed

Delivered custom WordPress and eCommerce websites for international clients, including theme customization, payment integration, automation workflows, deployment, troubleshooting, and post-delivery maintenance using PHP, MySQL, HTML, CSS, and JavaScript.

SKILLS

JavaScript Python SQL HTML/CSS React.js

Node.js Express.js Bootstrap Tailwind CSS

MySQL Firebase WordPress GitHub

CERTIFICATES

Web Development Bootcamp - Angela Yu

Udemy

Learned full-stack web development using modern technologies. Built responsive, interactive web applications with practical projects

Introduction to Python

Coursera

Learned the fundamentals of Python programming including variables, data types, control structures, functions, and basic problem-solving through practical exercises and hands-on coding tasks.
