

# SARMAD SULTAN

AI/ML Engineer · Backend developer · Graphic Designer

## ABOUT ME

I am a CS student at Namal University with hands-on experience in agentic AI, RAG pipelines, and backend development. I've spent 4+ years freelancing on Fiverr, which taught me discipline and how to deliver real world projects under pressure. Outside of tech, I'm a two-time debate champion and TEDx speaker — because building things well and communicating them clearly go hand in hand.
